EXPERIENCE

Full-Stack Web Developer / Founder
CryptoVania
January 2022 – Present

- Developed and maintained full-stack applications designed for scalability, maintainability, and modularity.
- Architected and built a scalable crypto research platform enabling real-time insights on digital assets and Web3 activity.
- Led design and implementation of multiple projects using React, Python, and various modern web technologies.
- Integrated AI and Web3 technologies to deliver features including wallet-based token swaps and AI-powered news summaries.

Customer Service Associate
Dominos Pizza
November 2018 – May 2024   *Lakewood, CA*

- Provided customer service in-person and over the phone, resolving issues efficiently.
- Maintained order accuracy and attention to detail during high-volume periods.

SOAR Student Assistant
CSULB Student Orientation and Registration
May 2016 – June 2019   *Long Beach, CA*

- Coordinated orientation events for 10,000+ incoming students annually, ensuring smooth transitions into the university.
- Assisted students and parents in person and over the phone, and directed them to additional resources.

EDUCATION

California State University, Long Beach
Bachelor of Science in Computer Science

CERTIFICATIONS & LICENSES

Scrimba - The AI Engineer Path   **May 2024**
Scrimba - The Frontend Developer Path   **Aug 2022**
CompTIA A+ Certification   **Nov 2020**

ORGANIZATIONS

Secretary & Director of Marketing
CSULB MAES (Latinos in Science and Engineering)
Aug 2015 – May 2018   *Long Beach, CA*

- Collaborated with other members of the Executive Board to plan logistics for the year, and upcoming events.
- Documented progress and coordinated meetings with our board of officers and members.
- Created marketing material to advertise our organization and our events around campus and on social media.

SKILLS

Frontend – React · Next.js · Tailwind CSS · JavaScript (ES6+) · TypeScript · HTML · CSS

Backend – Node.js · Python · PostgreSQL · Supabase · Firebase · FastAPI · Authentication · Analytics

DevOps & Tools – Git · Docker · VPS Deployment · Vercel · Linux · Sentry · Postman

AI – OpenAI GPT · LLMs · LangChain · Hugging Face · Multimodal Generative AI · Agentic AI · MCP Servers

Specialized Tech – Web3 Integration · Arduino · IoT · 3D Modeling · 3D Printing

PROJECTS

CryptoVania - All-in-One Crypto Research
cryptovania.com
React · Web3 · Python · PostgreSQL · Supabase · TypeScript · VPS

- Built a comprehensive platform aggregating live data on 10k+ cryptocurrencies, NFTs, news, videos, dApps, and more.
- Implemented OAuth-based authentication and database solutions to save portfolios, bookmarks, and watchlists.
- Integrated Web3 tools to allow connected wallets to interact with the platform, including our Uniswap DEX integration.

LiveCoder - AI Coding Platform
livecoder.online
React · Firebase · AI · Authentication · Serverless

- Developed a platform for real-time code editing, allowing users to easily discover, edit, and share code snippets.
- Integrated with GPT-4 API to allow users to generate HTML, CSS, and JavaScript code from text and image inputs.

Pokedex96 - Pokemon Tracker
pokedex96.com
React · CSS · JavaScript · Firebase · Authentication

- Designed a detailed replica of the Pokedex tracker, with a focus on creative and responsive design.
- Integrated a comprehensive Pokemon dataset with images and sounds, complete with user accounts to track collections.

Local AI - Offline AI Assistant
github.com/mrmendoza-dev/offline-chatbot
Node.js · Express · AI · React · TypeScript

- Engineered an AI chatbot UI that interfaces with open-source models on Ollama, enabling local, offline, and free AI usage.
- Enhanced with multimodal capabilities, allowing users to upload images and files for additional context.
